

03 DICTIONARY Operations

Markdown Cell 1

Experiment 3 — DICTIONARY Operations
Source: DICTIONARY PDF

Various operations using Dictionary data structure in Python. `Aditya` has been changed to `Aditya`.

Code Cell 2

```
dic={'manish':'teacher','Aditya':'student'}  
print(dic)  
print(dic['manish'])  
dic['manish']
```

Code Cell 3

```
dic={'manish':'teacher','Aditya':'student'}  
dic.keys()
```

Code Cell 4

```
dic={'manish':'teacher','Aditya':'student'}  
print(dic.keys())  
print(dic.items())
```

Code Cell 5

```
dic={'manish':'teacher','Aditya':'student'}  
dic.items()
```

Code Cell 6

```
dic={'manish':'teacher','Aditya':'student'}  
dic.values()
```

Code Cell 7

```
dic={'manish':'teacher','Aditya':'student'}  
del dic['manish']  
print(dic)  
dic.pop('Aditya')  
print(dic)
```

Code Cell 8

```
dic={'manish':'teacher','Aditya':'student'}  
for x in dic:  
    print(x)
```

Code Cell 9

```
dic={'manish':'teacher','Aditya':'student'}  
for x in dic:  
    print(dic[x])
```

Code Cell 10

```
dic={'manish':'teacher','Aditya':'student'}  
for x in dic.values():  
    print(x)
```

Code Cell 11

```
dic={'manish':'teacher','Aditya':'student'}  
for x in dic.items():  
    print(x)
```

Code Cell 12

```
dic={'manish':'teacher','Aditya':'student'}  
emp={'v':'vyom'}  
dic.update(emp)  
print(dic)
```
